Good morning [REDACTED] s 22(1)(a)(ii)

Could you please advise if you have had any advice/correspondence back from Laser Plumbing, regarding the smell (which we asked they attend urgently last Thursday) and subsequent alarm in the plant room?

Please note below, the alarm has gone off again and smell continues to linger.

Can you please have Laser look at this issue as a matter of priority, noting they installed the current style of macerator which was to reduce these issues from occurring.

Kind regards,

OFFICIAL

Good Afternoon § 22(1)(a)(ii)

Commercial are seeking an investigation and diagnosis by a suitably qualified and experienced plumber to identify the root cause of the odours and alarms at City Station Watch-house.

"Watch-house sewerage smell;

This smell comes and goes (more often here than not), but when present it is an aggressive and strong smell.

This usually originates from the female block of the Watch House and drifts down into staff areas, sometimes making it unbearable to complete work as required.

This needs to be thoroughly investigated by a qualified, quality plumber.

Suggested tests are, but not limited to:

- *A smoke test of sewer lines to ascertain if and where any sewer lines have issues (dislodged, broken or otherwise).*
- *The sewer/pump pit in the plant room adjacent to the gym area, the access lid does not sit correctly and is ajar (requiring to be seated correctly), not only can this cause smells to escape, it is also a trip hazard for any staff or contractors that require access to this area.*
- *A good clean out.*

Sewer alarm;

The alarm for the sewer pump is located under the TV in the staff work space in the Watch House and occasionally beeps, this continues for a number of hours and beeps at intervals of 6 minutes after muting.

I have only been at the Watch House for 2 months and this has happened approximately 3 times. "

Are you able to arrange for a plumber to attend City Station and complete some investigations and diagnose some resolutions for us, then provide Commercial with a thorough report of findings?

Do you require a Corrigo work order for this request? If so, we will raise one for this to be progressed.

Any queries, please let us know.

Thank you.

Good morning Team,

s 22(1)(a)(ii)

s 47E(a) and ACTP Commercial have commenced works to resolve the issues in the Watch-house plumbing s 22(1)(a)(ii) and his team are working with s 22(1)(a)(ii) to fix all the issues.

These urgent and unavailable works will be done as soon as possible, this will reduce the odour and hazards in the workplace caused by this fault. The most recent issues have been temporarily resolved. Once the below works are completed, smoke testing will be undertaken to ensure all leakage has been resolved.

THIS DOCUMENT IS RELEASED BY
THE AUSTRALIAN FEDERAL POLICE UNDER THE
FREEDOM OF INFORMATION ACT 1982

Quotation to replace pumps and controller.

Level Plumbing attended site to investigate a sewer smell in the watch house. Upon investigations we have found sewer pump 2 in the plant room was in fault. I have reset pump for temporary relief. While undertaking the float replacement at the end of last year, we have found pump one and two are in poor condition and are failing intermittently. We have inspected the controller, the controller has been modified to accommodate the muffin monster. The connection that have been made are below standard, this is causing. We recommend to upgrade the controller as well.

Scope of works to be completed:

- Attend site and set up exclusion zone and set up lifting equipment
- Pump out pit well as low as possible using the pumps and complete condition assessment of pit
- Isolate control panel and remove.
- supply and install new controller
- Remove pumps and clean all debris from pit
- Supply and install new Grundfos three phase pumps X2
- Supply and install new discharge line
- Supply and install Hydrostatic Level Transducers for sewer (optional)
- Pack up and leave site clean and tidy

Exclusions and Clarifications:

- Sullaging of pit
- Confine space entry

Level Plumbing is a member of Master Plumbers ACT, this means when you use Level Plumbing you can be sure that you have a plumber that adheres to the [MPA code of ethics](#) and you are covered by the MPA consumer guarantee, for more information click [here](#)

Good morning Commercial

An update on this issue:

The smell is so bad today that I would say the toilet needs to be made 'out of order'.

I couldn't even enter the area without gagging and used an alternative location. It was ok-ish earlier this morning (about 8am) but putrid by 10am.

s 22(1)(a)(ii) was nearby escorting workers and can attest to the absolute foul revolting smell.

Good afternoon Commercial

The smell is still there – not as bad but it's beyond a joke or funny now.

Can further investigations the isolate and deal with the smell please be undertaken. Perhaps the air vents above both toilet stalls need to be reviewed/cleaned. They are fluffy with dust – who knows, may be a dead critter has its final resting place there!

Subject: unidentified smell in ladies ground floor toilet. [SEC=OFFICIAL]

OFFICIAL

Hi Team,

For the past few weeks there has been a persistent odour in the ladies ground floor toilet. It's unpleasant, lingers, is hard to mask.

Initially I had the sanitary bins emptied and put a ½ bottle of Pine O Clean disinfectant down the drain and assumed this would resolve the issue.

It hasn't

Again today there is an unpleasant odour – I don't know when it returned.

- The sanitary bins were emptied on Tuesday and are currently empty so that cannot be the cause.
- I've put more disinfectant down the floor drain, which masks the smell, but it's still there.
- I have checked the locked wall soap dispensers that are no longer in use – they are not the cause.
- I've checked the locked paper towel bin and it is not the cause either.

There is nothing else in the room for me to check other than the ceiling inspection hatches which is not something I can do myself. It doesn't smell like dead rodent, but that's still a possibility I guess.

I'm at a loss to what is causing the smell.

Our toilets also have automatic air fresheners which are serviced monthly by Rentokil Hygiene – perhaps the scent this month isn't as strong and so we are smelling the unpleasant odour again??

I'd like to get to the cause of the odour so we can address it, but I am lost for ideas – do you have any suggestions?

I have put a spray bottle of Nilium (odour eliminator) on the shelf so ladies can spray the room. At times the odour is so bad ladies have reported gagging, and being unable to enter the room.

Help?

Hi All

There has been an extremely strong sewerage smell in the City Station muster room tonight. We cannot locate the source but the smell is definitely stronger than the normal wet weather smell we get in here.

We have been utilising fans to try and disperse the smell but it is not a pleasant work environment at the moment.

Can you please assist.

OFFICIAL

Good Morning Team,

The below works were completed last week, however, the sewerage smell is still an issue. The previous contractors who attended site believe the pits need new covers on them that seal properly, they did silicone around the metal lid which helped somewhat, however, the other cover does not completely shut. Obviously the silicone would have been broken to complete the below works and unless they are silicone each time the smell permeates through the building and I dread what summer will be like. Can you please investigate and advise as the daily smell is just terrible.

Subject: smell in ladies toilet - again - GF [SEC=OFFICIAL]

OFFICIAL

Hi Team,
The persistent dreaded smell in the ladies toilet on the ground floor has returned again.

I've attached the previous email chains for context.

The cleaner tells me it is at its worst first thing in the morning. She believes it is coming from the LHS cistern. She also thinks the smell in the room is not as bad if the toilets lids are kept closed.

When s 22(1)(a)(ii) came last time to commission the vent fans, he did say something about the cistern seals. I hope there are notes on the last job about this or we can get him back As previous plumbers were at a loss on what to do about it.

Can you please raise a work order, or re-activate the last work order?

Would you mind keeping me in the loop on this as I have a couple of female Sgts with particular interest in getting this resolved.

Many thanks

s 22(1)(a)(ii)

Afternoon s 22(1)(a)(ii)

Thanks for response.

I've cc'd the Commercial TL's into this for their awareness, and so they can assign a body from the team to escort for the door seal work.

Noting your response, Commercial will be on site to escort the contractors to patch the walls from the leak works recently on Monday/Tuesday 27th and 28th November from 0700hrs until 1500hrs.

Regards

s 22(1)(a)(ii)

Hi s 22(1)(a)(ii)

I understand that Commercial is stretched, however, that length of time is just not possible with the other duties I have at the station and causes too great an impact. I am appreciative of you trying to have these works completed but I will say after spending months with the smell in the station I also have no desire to spend time in closer proximity to it.

Cheers,

s 22(1)(a)(ii)

Thanks for the info s 22(1)(a)(ii)

Are you not happy to escort at all, or just that time/date doesn't suit?

Commercial are stretched with our major ACTP Projects and other facility attendances at the moment and will need to rely on some assistance for these types of escorts so the odour rectification works can rid the station of the ongoing smells.

We have advised s 47E(d) to cancel this attendance and will advise of a new day/date/time, with Commercial potentially needing to pause other activities to be on site if you are unable to assist.

Subject: RE: UPDATE: City Station Sewerage Smell [SEC=OFFICIAL]

Good afternoon all,

Please be advised the 2nd sewer pit lid was installed yesterday (photo's attached & below) which should significantly reduce any odours from escaping, as both smell sources have now been treated with sealed lids.

- AFP-022002045.02.01 raised to quote for the replacement of the sewer pit lid (redesign to prevent smell escaping. Awaiting quote. **Approved by ACTP Commercial 1/11/2023**

Also note: the installation of additional door seals (below work order) has been scheduled to occur next week 6th December 2023 (Commercial will be onsite with contractors).

- AFP-022002045.02.02 – installation of additional door seals. Awaiting quote. Technician has attended site to provide a quote. **Approved by ACTP Commercial 1/11/2023**

Juju is actually ok today.

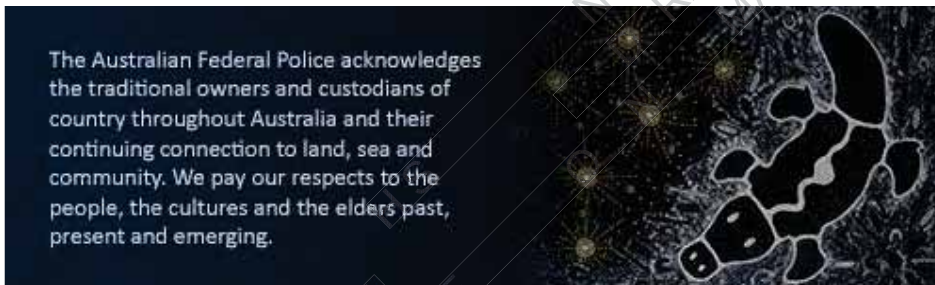

From my obs, mornings about 10ish (give or take) onwards is when the smell is 'horrific'. And you can't pick which day it will be.

It was still lingering yesterday afternoon about 4pm when I left, but nowhere near as bad as 2pm when it was soul destroying.

Good afternoon Commercial,

Can I please seek an update on the sewerage pump situation within the Watch House, as the air conditioning is still recycling a horrible smell and with this heat its not suitable to just run the remedy unit provided, as the work environment is far too warm. Can this please be escalated as a matter of priority, given the anticipated warm weather expected over December.

Hazard reports will be considered by WH staff as appropriate.

Kind regards,

OFFICIAL

Good Afternoon All

The plumber just attended and advised the covers to the sewerage do not fit correctly and the smell is escaping. They are unfortunately located next to the air conditioning so the smell is pumped through the watch house.

He advised earlier in the week some else attended and identified the issue and has quoted to replace the covers for ones that fit. Once the quote is accepted and the covers replaced the issue should be rectified.

Good Morning

There is again an horrific sewerage smell in the front office and foyer of the City Police Station. I believe it can also be found in the Watch House floor and through the muster room.

This commenced yesterday afternoon and is worse this morning.

I have submitted a hazard form as it is extremely unpleasant.

OFFICIAL

Good Morning [REDACTED] s 22(1)(a)(ii)

I'm so sorry was out at City station till 8 last night and didn't have access to my emails.

Feedback from the plumber who arrived last night was that there was a leak on level 2 caused by Corroded pipes – leaking from level 2 to the basement. It is also coming through the walls on the ground floor. [REDACTED] s 22(1)(a)(ii) was in attendance last night.

The plumber needs to replace some of the pipes today – he closed off the area so that they could hopefully dry out last night so that he can start cutting them out today. He also needs approval for it to be done. We will let you know once we receive the quote for the work.

We are also getting an electrician out today to have a look and ensure safety of the area and we are having several bio cleans undertaken on multiple floors. We had one Bio Clean last night but will need to do another one once the Plumber has finished his work.

Currently the staff at City station cant use any of the water/drains/toilets on level 2 so we have put signs up and communicated with the Inspector for the area.

Happy to discuss further but I can give you a further update once we hear more from the plumber.

Currently the BCP has not been enacted but I will let you know if anything changes.

Kind regards

OFFICIAL

Good Afternoon s 22(1)(a)(ii)

The plumber has come out and repaired the affected pipe. We are currently undertaking another bio-clean of the area and will be undertaking another one on Sunday.

We will need to meet to discuss next week any further remediation that will be required as it has gone into the wall cavities. I believe there is a meeting scheduled for Monday with s 22(1)(a)(ii) to talk through the Watch house refurb so we can raise this as well.

We are currently running a number of air purifiers out there and have put things into the air conditioning vents to absorb the odour.

That's all I have for now will let you know if there is anything further that comes up.

Kind regards

The plumber needs to replace some of the pipes today – he closed off the area so that they could hopefully dry out last night so that he can start cutting them out today. He also needs approval for it to be done. We will let you know once we receive the quote for the work.

We are also getting an electrician out today to have a look and ensure safety of the area and we are having several bio cleans undertaken on multiple floors. We had one Bio Clean last night but will need to do another one once the Plumber has finished his work.

Currently the staff at City station cant use any of the water/drains/toilets on level 2 so we have put signs up and communicated with the Inspector for the area.

Happy to discuss further but I can give you a further update once we hear more from the plumber.

Currently the BCP has not been enacted but I will let you know if anything changes.

Kind regards

OFFICIAL

Hi s 22(1)(a)(ii)

s 22(1)(a)(ii) I have been advised of the following from s 47E(d) Email to s 22(1)(a)(ii) dated 6 Feb **'Copper Pipe Inspection – s 47E(d) had to push back the camera inspection of the remaining levels until next Tuesday Feb 11th. They will have a cleared tech escorting this time around. I have asked them to move it forward to tomorrow or Monday if possible as they had advised s 22(1)(a)(ii) last week that it would be completed on Feb 5th.'**

I fortuitously just had s 47E(d) attend for an issue at Winchester and the contractor advised that he was undertaking the inspections at City Station. It was indicated that these works will be completed by the end of this week and a report completed and submitted by the end of the following week

An Occupational Hygienist will not undertake any investigation until s 47E(d) have completed their full inspection.

Chat further at our meeting tomorrow.

Regards

Subject: City Station - Sewage issues s 47E(A) ACP Commercial [SEC=OFFICIAL]

OFFICIAL

Good morning,

Just an overview of the communications between s 47E(a) and ACP Commercial regarding City station sewage issues.

9 January 2025 – Leak in City Station was reported s 47E(a) attended along with Commercial and s 47E(d) put a sleeve over the cracked copper pipe but was unable to replace pipe until quote was approved via s 47E(d)

10 January 2025 - s 47E(d) raised a work order AFP-022003010 – Extensive quote to replace all copper piping.
46 Days ago

15 January 2025 - ACP Commercial – Contacted s 47E(d) to review the potential risk of mould and bacteria that could be growing in cavities/ceiling spaces.
s 47E(d) advised that we needed to ensure there are no other cracks in the plumbing prior as the report will come back positive and with high readings. Once plumber has completed the re-piping of the station they could attend.

Contact made between ACP-Commercial and s 47E(d) regarding the progression of works:

20 January 2025 - ACP – ETA on plumber attending City Station ?
s 47E(d) Quote received on 21/1/2025 forwarded for approval.

23 January 2025 - ACP – ETA on plumber attending City Station ?
attending on 29 January 2025.

6 February 2025 - s 47E(d) has pushed back the works. Now attending City Station 11 February 2025.

13 February 2025 - s 47E(d) isn't able to attend today and have pushed back the works.

17 February 2025 - ACP – Emailed s 47E(d) chasing the report for City Station.
– Will chase s 47E(d) for the report

18 February 2025 - s 47E(d) – s 47E(d) advised they have found urgent repairs whilst conducting camera investigations. These will be repaired under a child work order. Level still have 2 small sections of pipe to review they will come back on the 24/2.

24 February 2025 - City Station – s 22(1)(a)(ii) advised that the smell is back in the City.
ACP – Messaged s 47E(d) Serval complaints coming in from City Station the sewage smell is back. As we had fresh air sponges put in place as of the 10 January 2025 which I was advised this would last for approx. 3 months. Can we have s 47E(d) attend to review why this isn't working ? Do you have the report from plumbing ? We have to discuss a way forward as this is a constant problem for OH&S with staff in the building.
s 47E(d) replied – Camera inspection was being completed today. s 47E(d) have submitted a quote today for some further works for in the level 1 & 2 female change rooms to out failed stack work re-pipe PVC and replace some toilet parts. I have asked for them to schedule these in asap. Will follow up un the morning for the report.
Watch house – called On call approx. 2130hrs - Please attend to investigate and rectify the bad odour that smells like sewerage affecting the whole watchhouse indoor area. Client advised that that this has been a problem recurring at site however tonight is worst as the

reeks through the staircase specially the floor steps. Please be advised that this poses OHS issue at site and needs to be attended ASAP.

ACTP – Work order for s 47E(d) to attend within a 4 hour response. – AFP-022003124
– above mentioned issue
Work order outcome:

- Completed by s 22(1)(a)(ii) - attended site
- Completed works as per request and replaced rubber seal on pit lids
 - Reoccurring issue needs to be investigated by a HVAC technician (air ducts) due to positive and negative air pressure in the room
 - Site to monitor

25 February 2025 - ACTP – Called both s 47E(f) s 22(1)(a)(ii) Need to know where this is currently sitting. Still haven't received information on the report or outcome from s 47E(d). s 47E(d)2(1)(a) called to advised that the works have been completed. s 47E(d) are reviewing the video/images and will have the report to s 47E(d) by end of business day.

Once I can confirm the report from s 47E(d) have completed all works I will contact s 47E(d) to attend as soon as possible.

Thanks

H: s 22(1)(a)(ii)

s 22(1)(a)(ii) Just dropped round to assist with the following media lines re City Station sewerage rectification.

Are you OK with the below?

- As part of ongoing rectification work, ACT Policing has been liaising with plumbers to identify and fix ageing sewerage infrastructure for all parts of City Station.
- Exploratory work been completed and no officers were required to be moved while this work occurred
- The rectification work is expected to begin on Monday (17 March 2025). Some minor impacts on work areas will occur from next week to allow this work to be done safely.
- Public access to the station and the ACT Watch House will not be affected.
- ACT Policing continues to work with the ACT Government on accommodation projects for Gungahlin Station, City Station and ACT Policing headquarters.

Thanks and happy to discuss.

Hi s 22(1)(a)(ii)

Today, (17 March) s 47E(d) will be attending after business hours and tomorrow evening to complete the replacement of the sewer lines servicing the level 1 and 2 men's bathrooms.

Once this has confirmed completed. A Hygienist from s 47E(d) will be attending the site to complete an assessment on the building including sampling of materials.

On the 3rd of March it was reported that an odour was on level 1 City Station men's bathroom. When s 47E(d) attended on the 11th March they found another leak which is what escalated the works to go forward this week.

Thanks

Subject: City Station Sewage smell - 23 Sept 2025 [SEC=OFFICIAL]

OFFICIAL

Good morning § 22(1)(a)(ii)

This morning when I entered the City station I noticed a sewage smell. I went into the Plantroom in the basement and noticed the leak (photos attached). It seems most of the leak has spread from the drains being backed up but mostly in the Boiler room. As per the photos you will see some of the sewage has come through the base of the walls from the Boiler room. The sewage leak looks to have happen over the last few days.

I noticed the works happening on Knowles place and am wondering if this could be due to what they have done.

Timeline of works:

At 0919hrs I contact yourself and § 22(1)(a)(ii) (ACT Government) to advise City Station has a smell.

At 0941hrs I contacted § 47E(d) and logged the leak. Parent Case order number #19702361. I then contacted § 22(1)(a)(ii) from AFP Property Operations who escalated the request.

At 1113hrs I contacted s 22(1)(a)(i) for an ETA and he advised s 47E(d) should be attending within the next 30 minutes.

I will wait on site and speak to s 47E(d) .

Please advise if you would like any other information.

Thanks

Caution: Message from external sender

OFFICIAL

Good Afternoon s 22(1)(a)(ii)

Commercial are seeking an investigation and diagnosis by a suitably qualified and experienced plumber to identify the root cause of the odours and alarms at City Station Watch-house.

"Watch-house sewerage smell:

This smell comes and goes (more often here than not), but when present it is an aggressive and strong smell.

This usually originates from the female block of the Watch House and drifts down into staff areas, sometimes making it unbearable to complete work as required.

This needs to be thoroughly investigated by a qualified, quality plumber.

Suggested tests are, but not limited to:

- *A smoke test of sewer lines to ascertain if and where any sewer lines have issues (dislodged, broken or otherwise).*
- *The sewer/pump pit in the plant room adjacent to the gym area, the access lid does not sit correctly and is ajar (requiring to be seated correctly), not only can this cause smells to escape, it is also a trip hazard for any staff or contractors that require access to this area.*
- *A good clean out.*

Sewer alarm:

The alarm for the sewer pump is located under the TV in the staff work space in the Watch House and occasionally beeps, this continues for a number of hours and beeps at intervals of 6 minutes after muting.

I have only been at the Watch House for 2 months and this has happened approximately 3 times.

"

Are you able to arrange for a plumber to attend City Station and complete some investigations and diagnose some resolutions for us, then provide Commercial with a thorough report of findings?

Do you require a Corrigo work order for this request? If so, we will raise one for this to be progressed.

Any queries, please let us know.

Thank you.

Subject: AWARENESS: SMOKE TEST_SEWER LINES_WATCH HOUSE [SEC=OFFICIAL]

OFFICIAL

Good Morning All,

s 47E(d) have confirmed the smoke test for the sewerage lines will take place tomorrow at City Station.

This test will take up to **11 hours** to complete.

Both Commercial and s 47E(w) will escort for the majority of this, however, looking to identify if you have capacity to provide an escort for a couple of these hours to allow staffing to rotate through.

It is envisaged that both s 47E(a) and Commercial will be on site to receive the contractors and sign them in, and then take them into the work area in question, then s 47E(w) will be on site for the end of the shift to ensure work is complete.

TIMES:

- Start – 0930hrs
- Finish – 2030hrs (approx.)

SCHEDULE:

-
*Two hour rotation, with watch-house potentially rotating multiple members through their two hours period

TIME/SHIFT	RESPONSIBLE AREA
0930 - 1130	s 47E(c) COMMERCIAL shared
1130 - 1330	COMMERCIAL
1330 - 1530	COMMERCIAL
1530 – 1730	WATCH-HOUSE
1730 - 1930	s 47E(d) & WATCH-HOUSE shared
1930 - 2030	s 47E(d)

Please review above, and let us know, if you are able to rotate staff through for escort on the given times (yellow) and for a potential shared rotation with s 47E(d) from 1730 to the end of the works at 2030hrs to allow a meal break for s 47E(d)

If you can't supply, all good, please let Commercial know ASAP so we can arrange staff overtime.

Thank you.

Regards

Sewerage Smell

Full Description:

There has been a smell of Sewerage in the Watch House for approximately 5-6 months. There have been numerous hazard reports put through - however - the smell still appears and is very strong. I am unsure if someone has actually come to have a look or fix the issue at any point. It is unpleasant to work in, and there are numerous stakeholders that come down to the watch house for meetings etc. It does not present ACT policing in a good way when external agencies come down and it is the first thing they smell.
If someone could please come and look at this ASAP it would be greatly appreciated.

Commissioner’s meeting brief

Title	Commissioner Kershaw and Chief Minister Andrew Barr MLA ACT Accommodation/Infrastructure
-------	---

THIS DOCUMENT IS RELEASED BY
THE AUSTRALIAN FEDERAL POLICE UNDER THE
FREEDOM OF INFORMATION ACT 1982

s 22(1)(a)(ii)

s.22(1)(a)(ii)

The City Police Station faces a real risk of closure in the near future due to persistent sewerage odour issues and recurring water leaks, problems that have plagued the facility for years. These ongoing issues have already necessitated the activation of the Business Continuity Plan (BCP) once (February, 2024), with police operations temporarily relocated to the EBB. On this occasion, Watchhouse functions were able to remain operational. If the City Police Station's Watchhouse is forced to close due to the ongoing sewerage smell,

s.47E(d)

Winchester Police Centre is also an ageing facility resulting in corresponding maintenance issues. Winchester is a converted Technical College, is at capacity and no longer meets the operational needs of ACT Policing. However, significant infrastructure works will need to be undertaken in the interim to ensure the facility continues to meet the operational needs of a modern police force.

Minister's Office Feedback

Background

1.

2.

3.

s 22(1)(a)(ii)

4. Last week, an ACT Policing member in City Station made a Workplace Health and Safety (WHS) incident report about the persistent sewage odour. This is a long-ongoing issue and is the seventh WHS report of this nature lodged since 1 January 2023.

Issues

5. The ACT Watch House is ACT Policing's primary charge, bail and custody facility where persons in police custody are held until their appearance in court or transfer to a corrections facility.
6. The City Police Station and ACT Watch House was constructed almost 60 years ago and was extensively refurbished 30 years ago. The current plumbing and sewerage system at City Police Station regularly requires urgent rectification to avoid the issuance of a Provisional Improvement Notice (PIN) relating to health and safety of ACT Policing staff and other City Station users.

7. The plumbing, sewerage and associated plant at the City Station consistently presents issues, with the odour of raw sewerage regularly permeating the Watch House and circulating through the lift shaft to other floors of the station. This has a significant impact on the day to day experience of all who work in the City Station and ACT Watch House, and has bearing on the operational functioning of the building. The issues are being caused by a combination of the following factors:
- a. the sewerage macerator regularly fails;
 - b. blockages of sewerage and other plumbing issues are near constant;
 - c. sewerage odours vent through floor waste outlets throughout the ACT Watch House;
 - d. toilets and related plumbing often fails due to age and Person in Custody (PICs) interference; and,
 - e. the lower ground floor has little airflow requiring the staff room door to be left ajar to allow airflow through the staff area which vents up the lift shaft into the rest of the City Station building;
8. I thank the ACT Government for prioritising ACT Policing's current and future accommodation needs which include commencing feasibility studies to consider the relocation of the Winchester Police Centre and City Police Station to better align ACT Policing in the City. Unfortunately the escalation of these issues presents a pressing need to urgently consider the status of City Police Station.

Potential issuing of PIN

9. Should the Watch House be required to close, whether as a result of a PIN or for other reasons, § 47E(1) § 47E(1)
10. The ACT Watch House is ACT Policing's primary charge, bail and custody facility where PICs are held until their appearance in court or transfer to a corrections facility. On average the Watch House intakes 270 persons per month.
11. The Commonwealth Ombudsman has recently conducted inspections of all ACT Policing custody facilities, and ACT Policing await their final report which is expected to articulate the Ombudsman's views on the state of ACT Policing facilities for the purposes of custody.
12. The Watch House has up to date business continuity procedures which articulate plans to move to an Alternate Work Location (AWL) in the event of an emergency evacuation or incident.
13. ACT Policing maintains an AWL for the ACT Watch House in a ready state for activation should the need arise at the Tuggeranong Police Station Cells, which is located approximately 20 kilometres from the City Police Station.

14

§ 47E(1)

15.

16.

s 47E(d)

17.

Mitigation measures

18. ACT Policing's mitigation measures to address the sewage smell include:

- a. A medium-term measure to progress the current investigation, with smoke testing and leak identification that is scheduled to recommence the week of 10 October 2023. ACT Policing Commercial received authority and have released the sewerage plans to
s 47E(d)
- b. The smoke testing will assist in determining the extent and timeframes of remedial works required.
- c. A new catch lid for the sewer pump/pit is currently being manufactured and due for install on 10 October 2023. This will provide for a greater seal around the pit, and significantly reduce the escape of odours.
- d. s 47E(d) met with s 47E(d) on Friday 29 September 2023 to investigate the return airflow for the Watch House that is currently housed within the Plant Room. This has been identified as a contributing factor for the sewage smell emitting up stairs within the City Station. A proposal with a quote will now be prepared to mitigate this issue.
- e. A comprehensive air quality assessment of the ACT Policing City Station and ACT Watch House was undertaken on 8 September 2022, with the subsequent report making several recommendations. All recommendations are being addressed by

s 47E(d) and the sewage smell related issue was also below the PPM recommendation.

19. From 1 January to 28 September 2023, there has been 24 Workplace hazard/incident reports submitted as per the following breakdown:

- a. seven relating to sewage odour
- b. five relating to water leakage
- c. two regarding faulty duress alarms
- d.

s 22(1)(a)(ii)

Proposed Actions

20. ACT Policing will continue to address building maintenance issues to mitigate the potential hazards associated with sewerage build-up and venting into the workspaces.

21. The ACT Policing City Station and Head Quarters feasibility studies have been funded in the 2023-24 Budget process, and a high-level timeline is provided below:

- a. November 2023 – Consultancy procurement.
- b. January 2024 – Phase 1: User requirements delivery.
- c. February 2024 – Phase 2: Site confirmation.
- d. April 2024 – Phase 3: Functional brief.
- e. August 2024 – Phase 4: Delivery model confirmation.
- f. December 2024 – Phase 5: Business case/project development.
